

COVID-19 (Coronavirus)

Information for dialysis patients

- It is important to continue your usual medical care, including dialysis, unless you are particularly unwell.
- Hand hygiene is very important. You will be asked to wash your hands with soap and water before and after dialysis.
- We also encourage you to practice good hand hygiene at home, washing your hands with soap and water for at least 20 seconds or using alcohol-based sanitiser. Dry your hands with paper towel.
- If you are not feeling well, contact the dialysis unit on **6627 9560** before coming in so we can be prepared.

If you are very sick, please go to your nearest hospital emergency department
